User Stories

1. User Registration:
   - As a user I should be able to sign-up so that I can share my own backlinks
   - As a user I should be able to verify my account through email so that I will be able to submit my own websites
   - As a user I should be able to login to my account so that I can check websites available for backlink requests
   - As a user I should be able to reset my password through email so that I can login to my account
   - As a user I should be able to change my own password in my profile so that I can login to my account using the new password

2. Website Submission:
   - As a user I should be able to add my own website so that I share it as a backlink with others
   - As a user I should be able to edit my own website so that I fix any errors
   - As a user I should be able to view all my websites containing DR & ranking so that I can keep up to date
   - As a user I should be able to delete my own website so that I get rid of unused ones

3. Request Guest Post:
   - As a user(requester) I should be able to send a request to a website with the post details so that I raise my website DR and ranking
   - As a user(receiver) I should be able to check my websites requests so that I can either accept or reject or ask for changes to the post through comment section
   - As a user(receiver) I should be able to either accept or reject the post modifications if he asks for so that I can share my website backlink

4. Points System:
   - As a user(receiver) every time I fulfill a request, points are added to my score based on my own website DR so that I can request backlinks from other websites

- As a user I should be able to request a backlink if my own points are higher than the requested DR so that I can share my website.
- As a user I should be able to view the DR that are weekly changeable so that I can use points to share my own backlinks.
